

**IOWA CITY COMMUNITY SCHOOLS  
509 S. DUBUQUE ST.  
IOWA CITY, IA 52240**

Lawn and Landscape Maintenance Estimate for 2006  
April 3, 2006

**LAWN**

**Cutting**

Proper cutting of your grass plants is essential to the health and vigor of your lawn. We pride ourselves in having the finest equipment available. The cutting height will vary from 2-1/2 inches in the Spring to 3-1/2 inches in the Summer to 3 inches in the Fall. The frequency of cutting varies year to year from 18-28 times depending on the weather conditions during the season. For a clean, finished look, we also trim your lawn with string trimmers and sweep sidewalks and driveways.

**Fertilizer and Weed Control**

Our fertilizers are all natural, organic and are applied at rates which ensure an even, healthy, growth cycle. Micro-nutrients, which enhance the growth of natural soil organisms, are included in all our fertilizers. This season we recommend the following applications, but can customize this program to fit your needs.

- . Early Spring. Complete natural organic fertilizer.
- . Late Spring. Complete natural organic fertilizer
- . Summer Visit. Complete slow release fertilizer with a lawn inspection for insects and disease.
- . Early Fall. Complete natural organic fertilizer
- . Late Fall. Winterizer fertilizer for strong root development.

## **Core Aeration**

Aeration is a cultural method which helps control thatch. It does this by pulling finger sized cores of soil from your lawn. The microbes contained in the soil biologically break down thatch. Aeration also allows for better nutrient movement, reduces soil compaction, improves air circulation, and prunes roots which stimulates growth. This practice is especially beneficial in high traffic areas.

## **Pest Management**

We will monitor the condition of the lawn for the presence of disease pathogens and insects. You will be notified about any problems that exist. Cultural controls will be implemented whenever possible. If any chemical controls are warranted, we will notify you as to the timing and the cost.

## **Seeding**

Seeding bare or thin areas in your lawn can be done in the spring or fall. Best results are often seen when seeding in the fall (between Aug. 15th and Sept. 15th). Spring seeding often requires two extra applications of preemergent herbicides to control annual grass. The cost of overseeding bare or thin areas in your lawn will be \$40.00 to \$50.00 per thousand square feet depending on the situation.

Important: Please remember the success of seeding depends on many things: weather, watering, traffic.

## **TREES AND SHRUBS**

### **Landscape Maintenance**

We will be on your property each month to complete the work listed below. This will allow us to take care of your maintenance needs so you can enjoy a well manicured property with a minimum of interruptions. This service includes cleaning up and hauling away debris.

1. Pruning ornamental plantings and shrubs, including the removal of dead, diseased and damaged wood, and shaping as needed.
2. Weeding of the beds.
3. Cultivating mulch beds as needed.
4. Edging the sidewalks and curbs.

## **Tree Maintenance**

We recommend a budget for each school per season for pruning trees. This will include removal of dead, diseased and damaged wood as well as pruning for shape and structure. An itemized list of the work completed will be furnished on your invoice.

## **Disease & Pest Management**

We can provide disease and insect identification on your trees and shrubs. Although these are usually secondary plant problems, cultural controls, such as pruning out the affected areas, and chemical controls can be used if warranted. If any chemical controls are warranted, we will notify you as to the timing and cost.

## **Mulching**

Mulching is a highly beneficial cultural practice for trees and shrubs. Spreading chipped bark under shrubs helps conserve valuable moisture and control weeds. Above all, mulch enhances the beauty and value of your property. We will cultivate and add mulch where needed at all locations.

## **MISCELLANEOUS**

### **Weed Control**

We will do manual and mechanical weed control of parking, trim, sidewalk, curb and other hard surfaced areas biweekly from May through August. We will do manual weed control of shrub and flower beds biweekly May through August.

## **CLEAN UPS**

### **Litter Removal**

We will remove litter at Bates Field and Trojan Field as well as surrounding grounds following athletic events. This includes all areas under the bleachers.

## **Spring Cleanup**

We will remove leaves, trash and debris from curbs and lawn, clean entrances to building of leaves and papers, remove any sand accumulation from curbs, and clean up and haul away debris.

Note: This is not a parking lot sweeping. Excessive sand accumulation will be bid and billed separately.

## **Fall Cleanup**

We will rake and blow leaves from the lawn, clean leaves and debris from the beds, sweep the curbs, clean other areas as needed, and clean up and haul away debris.

## **Watering**

Quality Care utilizes large mobile watering vehicles to provide adequate moisture to large areas and planting that cannot be reached by a hose or sprinkler. We can provide this service to recently sodded areas, peripheral or large plantings, and other applications that require transporting large amounts of water. We will be happy to bid this service upon your request.

## **Athletic Field Marking**

We will layout and line for track and field events, football, soccer, baseball, softball and marching band as well as practice fields and game fields. This service includes layout equipment, stencils and paint equipment.

## **Athletic Field Repair**

We will repair athletic fields by seeding and sodding as needed, pest and disease management, field surface repair, and post game repairs.

### Summary

All of our personnel are insured, licensed and educated with a minimum of two years experience or a minimum of a two year college degree. They will always be in uniform, courteous and well groomed.

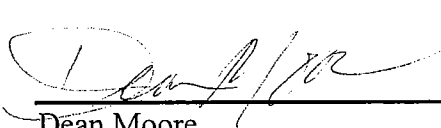

Please call us with any questions regarding the prices quoted or additional lawn care needs you may have. Our goal is to save you money and management headaches, as well as give you an improved landscape with a first class appearance. If you feel this proposal does not fit your needs, we will be happy to work on a program to keep your landscape looking beautiful.

We appreciate the opportunity to work with you.
